ACADEMIC YEAR 1868-9.

A. M. D. G.

BOSTON COLLEGE,

No. 761 HARRISON AVENUE,

BOSTON, MASS.

This Institution was incorporated May 25, 1863, by the State of Massachusetts with power "to confer such degrees as are usually conferred by Colleges in this Commonwealth, except medical degrees."

Schools were opened September 5th, 1864.

The terms are thirty dollars per session, payable in advance. Provision is made for the instruction of indigent, but meritorious candidates, who should present their claims for admission before the commencement of the session.

Day-scholars only are received.

Other conditions of admission are a good moral character, and a knowledge of the fundamental principles of Arithmetic and Grammar.

The academic year is divided into two sessions, the first beginning on the first Monday of September; the second, on the first Monday of February: but students are not precluded from entering at any time during the year.

The following are the ordinary holidays:

The days remaining from the close of an examination to the end of the session.

All holy-days of obligation.

From the twenty-third of December, to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President.

The hours of attendance are from 8½ A. M. to 2½ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P. M.; and on eves of festivals of obligation at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic or Mathematics; two hours a week in the study of modern languages; the rest of the time is allotted to the principal class, that of English, Latin and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical and scientific education.

The act of incorporation provides that "no student in said college shall be refused admission to, or denied any of the privileges, honors or degrees of said college on account of the religious opinions he may entertain." Students that are not Catholics will not be required to participate in any exercise distinctively Catholic; nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and, if they have never received the Sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning. From the inequality of preparation found in students entering, detention for more than a year in the lowest classes, is of more frequent occurrence. And from inequality of proficiency in the several branches, it frequently

happens that all the classes a scholar attends, do not belong to the same year; for example, that his class of Mathematics may be of the fourth year, whilst in his principal class (by which his position in the course is determined), he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of the English language, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation two hours of study a day will ordinarily suffice.

At the end of each recitation, its quality is recorded. Six is the highest number of marks given for a written exercise; four, for a translation or analysis; two, for any other exercise, and the same number for punctuality and for good-conduct; the number being diminished by one for every fault. A copy of this record (of which an example will be found below) is furnished the parents every week.

At the end of each month the marks are summed up. If any student has gained all the marks that could have been gained, he now receives one hundred; and others in proportion. The list of these new marks is read publicly; and those who, according to this list, are marked above a fixed number (usually about ninety or ninety-five), are rewarded with tickets, and the award is published in the *Boston Pilot*.

At the end of each session an examination is held of all that was studied during the session. A separate examiner is assigned to each class. The examination is conducted in writing, and lasts for about two weeks. In each branch, usually ten questions are proposed, so chosen as to be, as nearly as possible, exhaustive of the subject. Each examination paper is rated as were the daily lessons, six, four or two, if perfect, and inferior papers in proportion. The results of the whole examination of each student in the class are summed up, as the monthly lists were prepared; that is, the student whose examination is faultless is marked one hundred; and others in proportion.

At the Annual Exhibition, distinctions of three degrees are conferred, medals, books, or mere honorary mention. In the classes of Arithmetic, Book-keeping, French and German, at the Exhibition of 1869, ninety-five marks were required to obtain a medal; eighty-seven and five-tenths, for a premium; and eighty for honorary mention. In the other classes the requisite numbers were ninety-three, eighty-eight and eighty-three. For this decision the

sums of the monthly marks of each of the two sessions, and the results of each of the two examinations, enter into computation as four equal elements. For absolute perfection in all four, one hundred marks are now again given; inferior success is rated in proportion, and according to this last list the prizes are awarded. For the better comprehension of the system, an example will be given.

In addition, annual prizes have been instituted of fifty dollars in gold for the best English Composition, twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For these, all the students are allowed to compete, except scholars of the first year, and those to whom the prize may have been previously awarded.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishments.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory during the hour after the close of school.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education. The liberality of a friend has already furnished a collection of minerals. A gymnasium has been begun, and an ample cabinet of philosophical instruments will be in readiness for the graduating class.
